

### **Innovative veterinarian wanted!!!!**

We are not going to bore you with a job description because if you are a vet, you know what shelters do on a daily basis! Instead, we want to tell you about how you might fit into our progressive animal welfare organization and culture and hopefully get you excited about working at Heidi's Village.

Heidi's Village is a new build animal welfare organization and community resource located in sunny Phoenix, AZ. Conceived to address the question of what more can be done to help and empower animal rescue efforts in our city, we seek to provide boarding and medical services to animals in the custody of 501c3 rescue partners. In addition, we serve a limited number of our own animals including those in our newborn kitten nursery and a limited number of dogs and cats seeking their forever homes. We seek to aid in shelter/surrender intervention as well through our community partnerships. Heidi's Village occupies 5 acres. We have 6 state of the art canine kennel buildings, 2 feline buildings including open air/outdoor catio space and a central adoptions/administrative/clinic building.

Though spay and neuter as well as general wellness occupies part of our day, our mission is also to provide community members or partners with accessible, low cost medical care. If the thought of soft tissue and orthopedic surgeries to address issues that a pet might have as well as more complex dental cases excites you, then you might be a perfect fit for our clinic. We also seek to have a progressive behavioral/rehabilitative medicine program and encourage interest in these areas among all staff. We do not expect any one applicant to embody all of these skills and encourage diversity, personal/professional development and a collaborative approach in our practice. Applicants of all skills sets are encouraged to apply and will be strongly considered, including new graduates with a demonstrated record of interest in animal welfare/public service medicine.

Our campus was built to the highest standards for progressive sheltering and our clinic area rivals any modern private practice in equipment and practice environment. We are a shelter you will be proud to post pictures of online! We match this work environment with a supportive workplace culture, fair, market rate compensation and a 4/10 work week as well as a great support staff. We hope to recruit and retain associate veterinarians who wish to stay and grow with us for an extended period of time and who will be enthusiastic members of the animal welfare community. Phoenix is a rich and diverse community offering endless opportunities for leisure and recreation both within the city limits and throughout the state.
